

Datavized WebXR4SDGs

Datavized Technologies

Data Solutions for Good™ Initiative

“Datavized WebXR4SDGs” is a Datavized Technologies Data Solutions for Good™ initiative designed to apply WebXR technologies as inclusive and connected data systems for sustainable development. The initiative aims to address the problem of data accessibility and bridge gaps between data producers and users through the use of accessible web-based data presentation, analysis and visualization solutions. Through data-driven immersive communications tools accessible to all, we can make better-decisions together to implement the Sustainable Development Goals.

Experience the prototype on the Web and in VR:
